

ACT BioRemediation Products,

As I told you, I am updating you on the side by side test being conducted at our facility. I am sure you will be happy to learn that not only is your product less expensive, it is hands down outperforming the competition. We are very pleased with your product and I am passing your product (and contact) information on to our corporate office in Canada, and all of the camps here in the United States. I will be placing an order as soon as I have approval from camp management, which shouldn't take long as they are impressed too.

Regards,
Maintenance and Lube Lead
