

June 12, 2024

To Whom this may concern,

I am providing this letter of endorsement for Mr. Joe Grassi and his company, ACT BioRemediation. We have utilized his product, ACT Drain Mate, to safely and effectively clean algae blooms in large, commercial office building water features as well as maintaining clean drains throughout our facility.

As the Property Manager for the building leased by the Environmental Protection Agency Region 8 Headquarters in Denver, Colorado, we have certain products and protocols we must follow to ensure the EPA mission is being upheld in their leased facility. Our atrium lobby features a beautiful waterfall feature. As with most water features, we encounter algae blooms roughly every three months. In the past, this was a daunting task with having to drain the feature, apply algae remover (Occasionally having to use harsh chemicals), allow to sit overnight and refill. We started using ACT Drain Mate in April 2024. We simply put one scoop of the product directly into our flowing water feature and by the next day, all algae blooms had disappeared. We now use this as a monthly application and could not be happier with the results.

I would highly recommend this product to anyone looking for a product that actually works and is safe for the environment, plants, animals and humans!

Sincerely,

Jessica Butts  
Property Manager
